## New Handle For The XP Series Joystick – MF Handle

The XP joystick is available with several handles. After the UR, here is the MF handle that meets market demands to combine a traditional compact design with multiple functionalities and customization options.

The XP series is an innovative joystick that uses electric controls rather than hydraulic controls, which are too cumbersome and expensive. With its compact design, this mid-size joystick can be integrated into panels and armrests where space is limited while retaining the features and functionalities associated with larger handles.

### **Technical Features**

- All metal mechanisms deliver exceptional performance in a compact size
- 2-axis functionality
- Multifunction handle - option of integrating multiple APEM-qualified components including rockers and proportional control wheels
- Wrap around gaiter offering up to IP66 panel sealing
- Analog and CAN outputs
- Sealed electronics
