

HC Series Hand Controller

The HC Series hand controller is a pre-qualified solution for demanding environments. With its IP67 sealing, robust aluminium housing, and EMC/ESD certification, it ensures safe and intuitive command where standard controls fail.

Available in two sizes — **Small (up to 7 components)** and **Wide (up to 11 components)** — this manual controller adapts to a wide range of mobile and remote-operated systems.

A key advantage is the ability to integrate multiple components from APEM's extensive portfolio, including joysticks, pushbuttons, and toggles. Accessories such as a **5m connection cable, shoulder strap, and tablet/phone holder** make it a complete operator solution.

KEY BENEFITS:

- Product designed to meet MiL-STD-810G specification
- Plug-and-play integration with USB, CANopen, J1939, and analogue versions
- Fully customizable layout with components tailored to your requirements
- Optional engraving or labelling for traceability and easy identification
- Long connecting cable (up to 5m) for flexible remote placement
- Ergonomic design ensures a secure grip and smooth handling
- Switch guards prevent accidental activation of critical functions
- Enhanced safety with harness and switch guards during operation
