

BK-18650-PC4-E 2 Cell Battery Holder

Memory Protection Devices (MPD) is pleased to introduce the BK-18650-PC4-E, the latest addition to the BK-18650 battery holder family. Designed to accommodate two 18650 lithium-ion cells, this battery holder supports extended protected batteries up to 70 mm in length, making it an ideal solution for applications that require larger protected cells.

For added security, batteries can be retained using the BK-18650-PC4-COVER (sold separately), providing a secure and reliable battery installation.

Also Available

BK-18650-CLIP – A metal clip option that can help reduce space requirements in compact designs.

Key Features

- Designed to accommodate protected 18650 batteries up to 70 mm in length
- Extends the MPD BK-18650 product family beyond standard 67–68 mm protected battery holders
- Secure battery retention using the optional BK-18650-PC4-COVER strap design
- Reliable spring and contact design for consistent electrical performance
- Suitable for portable, industrial, and embedded electronic applications
- Optional BK-18650-CLIP available for space-constrained installations
